

Town Steel Bin

Metal and mostly-metal items are valued on the recycling market. It is important to divert them through the appropriate streams to ensure recycling of these metals.

Items accepted at the site:

Small to medium-sized items: flatware, small metal shelves, microwaves, toasters, portable barbeques, damaged bicycles and similar small-sized items are accepted.

Large-sized scrap metal: stoves, ornamental light posts, washers, dryers, aluminum siding, etc. are accepted. They can also be dropped off at a number of other locations for free – check the internet or Yellow Pages.

Not accepted at the site:

Appliances containing refrigerant: freezers, fridges and other appliances containing refrigerant: Fridges freezers, air conditioners, and dehumidifiers (as well as other appliances) contain refrigerants. These refrigerants require special disposal. Appliances that contain refrigerants will need to be disposed of at a location with staff trained on proper collection and disposal methods for refrigerants. One such location is Kimco Steel Sales.

Other Options:

A number of private scrap metal collectors operate in Gananoque and the surrounding area. Depending on what you have, they may pick up your items for free. Search the internet or Yellow Pages to find one.
